Contents

I. Epidemiology
Mary C. Dufour and Richard K. Fuller, Section Editors

Overview
Mary C. Dufour and Richard K. Fuller

Chapter 1
Vulnerability to Alcoholism in Women: Genetic and Cultural Factors
Shirley Y. Hill

1. Introduction .................................................. 9
2. Epidemiology of Alcohol Abuse and Alcoholism in Women ...... 10
3. Evidence for Genetic Mediation .................................. 11
   3.1. Family Data ............................................. 11
   3.2. Adoption Data ........................................... 13
   3.3. Twin Studies ............................................ 14
4. Premise: Two Types of Alcoholism in Women ................... 14
   4.1. Evidence for Genetic Mediation of the Early-Onset Form ... 15
5. The Need to Integrate Neurobiological and Sociocultural
   Perspectives ................................................... 15
   5.1. Characterizing the Neurobiological Factors That May Be
       Transmitted .............................................. 16
   5.2. Neurobiological Characteristics ............................ 18
   5.3. Sociocultural Aspects of Alcoholism Vulnerability ........... 21
6. Conclusions ................................................... 24
References ..................................................... 25

Chapter 2
Drinking and Problem Drinking in US Women: Patterns and Recent
Trends
Sharon C. Wilsnack and Richard W. Wilsnack

1. Trends in Women's Drinking and Drinking Problems ............ 30
   1.1. Historical and Cross-National Perspectives ................. 30
Chapter 4

Violent Victimization among Women with Alcohol Problems
Brenda A. Miller and William R. Downs

1. Introduction ................................................. 81
2. Empirical Evidence Linking Childhood Victimization and the
   Development of Alcohol Problems in Women ................... 82
   2.1. Empirical Evidence ....................................... 82
   2.2. Key Variables ............................................ 87
   2.3. Summary of Empirical Evidence ........................... 89
3. Importance of Methodological Issues ............................ 89
   3.1. Retrospective Recall ...................................... 89
   3.2. Prospective Studies ...................................... 90
   3.3. Other Methodological Considerations ...................... 91
4. Connecting Victimization Histories with the Development of
   Women's Alcohol Problems ................................... 92
   4.1. Alcohol as a Coping Mechanism .......................... 92
   4.2. Identification with Deviant Peer Groups ................... 93
   4.3. Use of Alcohol to Numb Psychological Pain ............... 94
5. Implications of Findings ...................................... 96
   References ................................................................ 98

Chapter 5

Women, Alcohol, and Driving
Patricia F. Waller and Frederic C. Blow

1. Motor Vehicle Crash Casualties Predominantly Male ............ 103
2. Drunken Driving Decreasing ................................... 104
3. Gender Differences and Drinking and Driving Trends .......... 105
4. Gender Differences in Treatment of Drivers ..................... 108
5. Gender Differences in Recidivism ................................ 110
6. Gender Differences in Behavior .................................. 111
7. Women's Changing Patterns of Behavior ....................... 112
8. Gender Differences in Crash Risk .............................. 113
9. Alcohol Effects on Injury ...................................... 114
10. Gender Differences in the Effects of Chronic Alcohol Use on
    Injury .................................................................. 115
11. Gender Differences in the Potentiating Effects of Acute
    Administration of Alcohol on Injury ......................... 116
12. Implications for Prevention of Drinking and Driving for Women 117
   12.1. Women Must Be Informed .................................. 117
   12.2. Targeting Women ......................................... 118
12.3. Gender Equality ........................................... 118
12.4. Future Research Needs .................................... 118
13. Conclusion ................................................... 120
   References ................................................... 120

Chapter 6

Employed Women with Alcohol Problems Who Seek Help from
Employee Assistance Programs: Description and Comparisons

Terry C. Blum, Paul M. Roman, and Eileen M. Harwood

1. Introduction ................................................... 126
2. EAPs .......................................................... 126
3. Research Methodology ......................................... 128
4. Description of Employed Women with Alcohol Problems Who
   Use EAP Services ............................................ 129
5. Comparisons of Men and Women with Alcohol Problems Who
   Use EAP Services ............................................. 134
6. Comparisons within and between Occupational Categories .......... 140
7. Characteristics of Women with Probable Alcohol Problems Who
   Were Not Assessed as Such by EAP Personnel ................... 147
8. Comparisons of Women with and without Multiple Problems .... 150
9. Concluding Observations ..................................... 153
   References ................................................... 154

II. Physiology

Mary C. Dufour and Richard K. Fuller, Section Editors

Overview

Mary C. Dufour and Richard K. Fuller

Chapter 7

Gender Differences in Alcohol Metabolism: Physiological Responses
to Ethanol

Holly S. Thomasson

1. Introduction ................................................... 163
2. Variability in Human Alcohol Metabolism: General Considerations 164
3. Comparisons Studies of Metabolic Rate in Men and Women ........ 166
4. The Role of Sex Hormones in Ethanol Metabolism .................. 171
5. Gender Differences in Hepatic ADH and Cytochrome P450 .......... 173
6. Gender Differences in the Gastric Metabolism of Ethanol .......... 173
## Contents

7. Summary and Recommendations for Future Work .......................... 174
   References ........................................................................... 175

---

### Chapter 8

**Mental and Physical Health Consequences of Alcohol Use in Women**

*Shirley Y. Hill*

1. Introduction: Prevalence of Use and Abuse in Females .................. 181
2. Adverse Health Consequences in Alcoholic Women ....................... 182
3. Alcohol-Related Health Consequences by Life Stage ...................... 183
   3.1. Use of Alcohol and Other Drugs among Adolescents and Young Adults ................................................................. 183
   3.2. Alcohol Use in Middle-Aged Women ................................. 184
   3.3. Alcohol Use during the Later Years .................................. 187
4. Liver Pathology ....................................................................... 188
5. Neuropathological Effects of Alcohol ........................................ 189
6. Psychiatric Comorbidity ....................................................... 189
7. Domestic Violence .................................................................. 190
8. Human Immunodeficiency Virus and Acquired Immune Disease .... 192
9. Conclusions .......................................................................... 194
   References ........................................................................... 194

---

### Chapter 9

**Alcohol Effects on Hormone Levels in Normal Postmenopausal Women and in Postmenopausal Women with Alcohol-Induced Cirrhosis**

*Judith S. Gavaler*

1. Alcohol and Postmenopausal Estrogenization .............................. 199
2. Effects of Moderate Alcohol Consumption on Hormone Levels in Normal Postmenopausal Women ........................................ 200
   2.1. Detection of an Effect of Alcohol on Hormone Levels ........ 200
   2.2. The Context of Moderate Alcoholic Beverage Consumption . 202
3. Hormonal Relationships in Postmenopausal Women with Alcohol-Induced Cirrhosis .................................................. 203
   3.1. The Study Sample ....................................................... 203
   3.2. Liver Disease Severity as a Determinant of Hormone Levels 204
   3.3. Potential Prognostic Value of Hormone Levels ............... 206
4. Summary ............................................................................... 207
   References ........................................................................... 207
Chapter 10

Gender Differences in Animal Studies: Implications for the Study of Human Alcoholism
Francine E. Lancaster

1. Gender Differences in Response to Alcohol ...................... 209
   1.1. Genetics and Environment ............................... 210
   1.2. Hormone Secretion, Brain Function, and Behavior .......... 211
2. Gender Differences in the Brain ................................ 211
   2.1. Neurosteroids in the Brain ................................ 211
3. New Research Findings ....................................... 213
   References ................................................... 213

Chapter 11

Sex Distinctiveness in Effective Genotype
Gerald E. McClearn

1. Introduction .................................................. 217
2. X-Linkage .................................................... 218
3. Sex Differences in Autosomal Genes ............................ 219
   References ................................................... 221

Chapter 12

Sex Differences in Ethanol-Related Behaviors in Genetically Defined Murine Stocks
Byron C. Jones and Keith E. Whitfield

1. Sex Differences in Alcohol-Related Problems in Humans .... 223
2. Approaches to Understanding Basic Processes Using Genetically Defined Animals ............................. 224
3. Sex Differences in Alcohol-Related Behaviors in Genetically Defined Animals .................................. 226
   3.1. Hypnotic and Hypothermic Sensitivity ..................... 226
   3.2. Effects of Ethanol on Locomotion ......................... 226
   3.3. Ethanol Self-Administration ................................ 227
4. Summary .................................................... 228
   References ................................................... 229
Chapter 13

Sex Differences in Mesolimbic Dopamine Responses to Ethanol and Relationship to Ethanol Intake in Rats

Betty A. Blanchard and Stanley D. Glick

1. Introduction ................................................ 231
2. Methods .................................................... 233
   2.1. In Vivo Microdialysis .................................... 233
   2.2. Self-Administration .................................. 233
3. Results ...................................................... 234
   3.1. In Vivo Microdialysis .................................. 234
   3.2. Ethanol Self-Administration ......................... 235
   3.3. Correlations between Baseline Neurochemical Measures and Ethanol Intake ........................................ 236
   3.4. Correlations between Peak Ethanol-Stimulated Dopamine Release and Ethanol Intake ......................... 237
4. Discussion .................................................. 239
References .................................................. 240

Chapter 14

Anxiolytic Effects of Steroid Hormones during Estrous Cycle: Interactions with Ethanol

Michelle D. Brot, George F. Koob, and Karen T. Britton

1. Introduction ................................................. 243
   1.1. Anxiety and Alcohol Effects in Human Females ............ 244
   1.2. Gender Differences and Hormonal Effects on Anxietylike Behavior in Rats ........................................ 244
   1.3. Steroid Hormone Effects on Behavior ...................... 245
2. The γ-Aminobutyric Acid–Benzodiazepine Complex ............. 245
   2.1. Structure ................................................ 245
   2.2. Neurosteroid Binding .................................... 245
   2.3. Interaction with Steroids .................................. 246
3. The Effects of Synthetic Steroids on Anxiety Mechanisms ...... 247
   3.1. The Conflict Test ........................................ 247
   3.2. Alphaxalone ............................................ 247
   3.3. Anxiolytic Activity of Alphaxalone ........................ 248
   3.4. Alphaxalone Reverses Stress Response ..................... 249
4. The Role of Gonadal Steroids in the Effects of Ethanol and Anxiolytic Drugs during the Estrous Cycle ........................ 252
   4.1. Sex Differences in the Anxiolytic Effects of Ethanol ........ 252
   4.2. Effects of Ethanol Vary during the Rat Estrous Cycle ..... 253
   4.3. The Interaction of Steroid Hormones and Chlordiazepoxide in Anticonflict Behavior .......................... 253
III. Behavior and Treatment Issues

_Alfonso Paredes, Section Editor_

Overview
_Alfonso Paredes_

Chapter 15

Women, Alcohol, and Sexuality
_Linda J. Beckman and Kimberly T. Ackerman_

1. Alcohol Use, Physiological Sexual Arousal, and Sexual Feelings . 269
2. Alcohol Use and Sexual Behavior .............................. 270
  2.1. Alcohol Use and Risky Sexual Behavior .................... 271
3. Expectancies about Alcohol Consumption and Sexual Behavior in Women ................................................................. 272
4. Alcohol Use and Sexual Dysfunction .......................... 273
5. Sexual Orientation ........................................... 275
6. Sexual Violence against Women ...................................... 277
  6.1. Incest and Childhood Sexual Abuse ........................ 277
  6.2. Sexual Assault and Alcohol Consumption ................. 279
7. Conclusions .................................................. 282
References .................................................... 283

Chapter 16

Cognitive Psychosocial Performance and Recovery in Female Alcoholics
_Sara Jo Nixon and Susan Wagner Glenn_

1. Introduction ................................................. 287
2. Psychosocial Functioning ...................................... 288
  2.1. Psychological/Psychiatric and Social Problems ......... 288
  2.2. Behavioral Disorders ..................................... 290
3. Cognitive Performance ........................................ 292
  3.1. Neuropsychological and Cognitive Tasks ............... 292
  3.2. Neuropsychiological Assessments ..................... 294
  3.3. Contributing Factors .................................... 294
4. Prediction of Relapse ........................................ 296
Chapter 19

Patterns of Alcohol Use among Ethnic Minority Adolescent Women

Ruth W. Edwards, Pamela Jumper Thurman, and Fred Beauvais

1. Introduction ..................................................................... 369
2. Patterns of Use ............................................................ 370
   2.1. Prevalence Rates .................................................. 370
   2.2. Sociocultural Factors and Their Relationship to Alcohol Use 372
   2.3. Summary .......................................................... 377
3. Method ........................................................................ 377
4. Results and Discussion .................................................. 378
   4.1. Gender and Grade ................................................ 378
   4.2. Ethnicity and Grade .............................................. 378
   4.3. Age of First Involvement with Alcohol by Gender and Ethnicity .................................................. 380
   4.4 Peer Influence on Alcohol Use by Gender and Ethnicity .................................................. 380
5. Conclusion .................................................................... 383
References ........................................................................ 383

Chapter 20

Alcoholism in the Family: A Multicultural Exploration

Andrea G. Barthwell

1. Introduction ..................................................................... 387
2. Basic Assumptions and Definitions .................................. 388
   2.1. Ethnicity and Culture ......................................... 388
3. Framing the Problem .................................................... 389
   3.1. African-Americans ............................................ 389
   3.2. Native Americans .............................................. 391
   3.3. Alcoholism ..................................................... 392
4. Women and Drinking: Biosociocultural Context .............. 393
   4.1. Biology ............................................................ 394
   4.2. Culture ............................................................ 394
   4.3. Socialization ..................................................... 396
5. Presentation of the Case Study ....................................... 397
   5.1. Family Genogram ................................................ 397
5.2. Religiosity/Spirituality ..................................... 399
6. Case Speculation ............................................... 400
6.1. Limitations of Case ....................................... 400
6.2. "Family Study" versus "Family History Study" .............. 401
6.3. Case Speculation .......................................... 402
7. Conclusion ..................................................... 403
References ..................................................... 404

Chapter 21

Gender Differences for the Risk of Alcohol-Related Problems in Mulitple National Contexts: A Research Synthesis from the Collaborative Alcohol-Related Longitudinal Project
Kaye Middleton Fillmore, Jacqueline M. Golding, Steven Kniep, E. Victor Leino, Carlisle Shoemaker, Catherine R. Ager, and Heidi P. Ferrer

1. Introduction: Gender Differences for the Risk of Alcohol-Related Problems ....................................................... 410
1.1. The Individual-Level Evidence .................................. 411
1.2. The Contextual Evidence .................................. 413
1.3. The Model ................................................ 416
2. Methods ....................................................... 417
2.1. The Variables ............................................ 418
2.2. The Analyses ............................................ 419
3. The Findings ................................................... 420
3.1. The Total Sample of Studies ................................ 420
3.2. Partitioning the Samples by the Proportion of Women in the Work Force ............................................... 423
3.3. Partitioning the Samples by the Female Suicide Rate ...... 423
3.4. Partitioning the Samples by Both the Proportion of Women in the Work Force and the Female Suicide Rate ............. 426
4. Discussion .................................................... 429
4.1. Gender as a Risk Factor for Drinking Problems in "Traditional" and "Modern" Social Contexts ......................... 431
4.2. Gender as a Risk Factor for Drinking Problems in Low- and High-Stress Social Contexts ............................... 432
4.3. The Combined Effects of Societal-Level Stress and Societal-Level "Traditionality/Modernity" ......................... 432
5. Conclusions ................................................... 433
References ..................................................... 436

Contents of Previous Volumes ...................................... 441
Index ............................................................. 455
