Preface vii

Committee Members ix

Tutorial

An overview of the SAE Architecture Analysis & Design Language (AADL) Standard: a basis for model-based architecture-driven embedded systems engineering
   Peter H. Feiler, Bruce Lewis, Steve Vestal, Ed Colbert

Session 1: Models and Analysis

Deploying QoS Contracts in the Architectural Level
   Sidney Ansaloni, Alexandre Sztajnberg, Romulo Cerqueira, Orlando Loques 19

Hierarchical Composition and Abstraction in Architecture Models
   Pam Binns, Steve Vestal 35

Pattern-Based Analysis of an Embedded Real-time System
   Architecture
   Peter H. Feiler, David P. Gluch, John J. Hudak, Bruce A. Lewis 51
An ADL Centric Approach for the Formal Design of Real-Time Systems
  Sébastien Faucou, Anne-Marie Déplanche, Yvon Trinquet

Session 2: Specification and Design

SafArchie Studio: ArgoUML Extensions to Build Safe Architectures
  Olivier Barais, Laurence Duchien.

Enhancing the Role of Interfaces in Software Architecture Description Languages (ADLs)
  Seamus Galvin, Chris Exton, Finbar McGurren

How ADLs can help in adapting the CORBA Component Model to Real-Time Embedded Software Design
  Sylvain Robert, Vincent Seignole, Sébastien Gérard, Stéphane Ménoret, Virginie Watine, Ansgar Radermacher, François Terrier

UML2 as an ADL hierarchichal hardware modeling
  Arnaud Cuccuru, Philippe Marquet, Jean-Luc Dekeyser

Session 3: Domain Specific Architecture Description Languages

Specification of Intel IA-32 using an Architecture Description Language
  Jeff Bastian, Soner Onder

COTRE as an AADL Profile
  Patrick Farail, Pierre Gaufillet

EAST-ADL an Architecture Description Language, Validation and Verification Aspects
  Vincent Debruyne, Françoise Simonot-Lion, Yvon Trinquet

Building Tool Suite for AADL
  Jean-François Tilman
