

Table of Contents

Introduction

1. Aim and Organization of the Book.	1
2. Brief Historical Survey of Photochromism.	2
3. Definitions of Photochromism	2
4. Brief Analysis of the Different Chapters and their Main Topics.	4
5. Conclusion and Future Developments	8
6. References.	9

1. Spiropyrans

Robert C. Bertelson

1.1. Introduction.	11
1.2. Synthesis.	13
1.2.1. General Summary	13
1.2.2. Intermediates for Spiropyrans	15
1.2.2.1. Fischer's Base Syntheses	17
1.2.2.2. Fischer's Base Salts by Alkylation of Indolenines	19
1.2.2.3. Fischer's Bases from Oxindoles	22
1.2.2.4. Fischer's Bases by Oxidation of Indolines	23
1.2.2.5. Substitution in Fischer's Bases	27
1.2.2.6. Preparations of Indolenines	29
1.2.2.7. Preparation of Indoles.	30
1.2.3. Preparations of Spiropyrans.	31
1.2.4. Substitution in Spiropyrans.	36
1.3. New Materials. Properties and Structure-Property Relationships.	37
1.3.1. Spiropyrans in Fluid Solutions.	37
1.3.2. Spiropyrans with Long-wavelength Absorption	53
1.3.3. Spiropyrans as Vapor-Deposited and Amorphous Films	56
1.3.4. Polymeric Spiropyrans.	57

1.3.5. Spiropyran Aggregates	59
1.3.6. Mechanistic Studies: Photocoloration, Photodecoloration, Fatigue and Photodegradation	60
1.3.7. Reactions of Spiropyrans with Inorganic Reagents	61
1.3.8. Spiropyrans in Sol–Gel Matrices	62
1.3.9. Quantum Mechanical Calculations	63
1.3.10. Optically Active Spiropyrans	64
1.4. Applications and Future Trends	65
1.5. Some Representative Preparations	68
1.5.1. 6-NitroBIPS.	68
1.5.2. 3-Phenyl Fischer’s Base and its Hydroiodide	69
1.5.3. 5-Formylsalicylaldehyde	71
1.6. References	73

2. Spirooxazines

Shuichi Maeda

2.1. Introduction	85
2.2. Structure, Synthesis, and Photochromic Properties	86
2.2.1. Substitution on the Naphthoxazine Ring Moiety	86
2.2.2. Substitution on the Indoline Ring Moiety	87
2.2.3. Other Indolinospirooxazines	89
2.2.4. Miscellaneous Spirooxazines	91
2.2.5. Chelation of Spirooxazine Derivatives	93
2.2.6. Crowned Spirooxazines	94
2.2.7. Electropolymerization of Spironaphthoxazine–Thiophene Derivatives	94
2.3. Molecular Structure and Mechanism of the Photochromic Reactions	96
2.3.1. Nature of the Closed Form	96
2.3.2. Nature of the Colored Form	96
2.3.3. Mechanism of the Photochromic Reactions	99
2.4. Applications	101
2.4.1. Stabilization of Spirooxazines	101
2.4.2. Commercial Plastic Photochromic Lenses	102
2.4.3. Microencapsulated Photochromic Ink	103
2.4.4. Photochromic Lamiglass	104
2.5. Synthesis Examples	105
2.5.1. Synthesis of 1,3,3-trimethylspiro[indoline-2,3'-[3H]naphth]- [2,16][1,4]oxazine] (Compound 1)	105
2.5.2. Synthesis of 6'-indolino-1,3,3-trimethylspiro[indoline-2,3'-[3H]- naphth[2,1- <i>b</i>][1,4]oxazine] (Compound 7)	106
2.5.3. Synthesis of 1',3',3'-trimethylspiro[3 <i>H</i> -naphth][2,1- <i>b</i>][1,4]- oxazine-3,2'-piperidine (Compound 16)	106

2.5.4. Synthesis of Compound 19	107
2.6. References	107

3. Benzo and Naphthopyrans (Chromenes)

Barry Van Gemert

3.1. Introduction	111
3.1.1. Definition	111
3.1.2. Historical Perspective	111
3.1.3. Current Review	113
3.1.4. Photochromic Mechanism	113
3.1.5. Performance Testing	114
3.1.6. Fatigue Testing	115
3.1.7. Fatigue Specific to Pyrans	116
3.1.8. Stability and Stabilization	117
3.2. 3 <i>H</i> -Naphtho[2,1- <i>b</i>]pyrans	117
3.2.1. Nomenclature	117
3.2.2. Structure–Photochromic Activity Relationships	118
3.2.2.1. Substitution at the 1- and 2-Positions	118
3.2.2.2. Substitution at the 3-Position	119
3.2.2.3. Pyran Substitution via Heteroaromatic Annellation	123
3.2.2.4. Substitution at the 5-Position	124
3.2.2.5. Substitution at the 6-Position	124
3.2.2.6. Substitution at the 8-Position	126
3.2.2.7. Substitution at the 7, 9, and 10-Positions	127
3.2.2.8. General Note	127
3.3. 2 <i>H</i> -Naphtho[1,2- <i>b</i>]pyrans	127
3.3.1. Nomenclature	127
3.3.2. Substituent Effects	128
3.3.2.1. Substitution at the 2-Position	128
3.3.2.2. Substitution at the 5-Position	129
3.4. 2 <i>H</i> -Naphtho[2,3- <i>b</i>]pyrans	131
3.5. 2 <i>H</i> -1-Benzopyrans (Chromenes)	132
3.5.1. General	132
3.5.2. Substituent Effects	133
3.6. Synthetic Methods	136
3.6.1. Preparation of 3,3-Diphenyl-3 <i>H</i> -naphtho[2,1- <i>b</i>]pyran	136
3.6.2. Preparation of 2-Methyl-7,7-diphenyl-7 <i>H</i> -pyranol[2,3- <i>g</i>]- benzothiazole	136
3.6.3. Preparation of 2,2'-Spiroadamantylidene-2 <i>H</i> -naphtho[1,2- <i>b</i>]- pyran	136
3.7. Concluding Remarks	137
3.8. References	137

4. Fulgide Family Compounds: Synthesis, Photochromism, and Applications

Mei Gong Fan, Lianhe Yu, and Weih Zhao

4.1. Introduction	141
4.2. Fulgides with Aromatic Ring Systems.	144
4.2.1. Phenyl Fulgides	144
4.2.2. Nuclear Magnetic Resonance Spectroscopy.	145
4.2.3. X-Ray Crystallography	147
4.2.4. UV-Visible Spectroscopy	148
4.2.5. Photochromic Reactions, Substituent Effects and Fatigue Resistance of Phenyl Fulgides	149
4.2.6. Miscellaneous Aryl Aromatic Fulgides	152
4.3. Fulgides with Heterocyclic Ring Systems	154
4.3.1. Furyl Fulgides	154
4.3.1.1. Substituent Effects on the Quantum Yield of Photochromic Reactions of Furyl Fulgides	154
4.3.1.2. α -Alkyl Substituent Effects on the Photochromism of Furyl Fulgides	155
4.3.1.3. Steric Effects on the Photochromic Behavior of the Alkylidene Group of Furyl Fulgides	156
4.3.1.4. Comprehensive Steric Effect on the Quantum Yield of the Photoreactions of Furyl Fulgides	157
4.3.1.5. Photochromism of Furyl Fulgides in Polymer Matrices .	160
4.3.1.6. Crystal Structures of Furyl Fulgides	161
4.3.1.7. Helical Chirality of Furyl Fulgide	161
4.3.2. Thienyl Fulgides	161
4.3.3. Indolyl Fulgides	164
4.3.4. Pyrrolyl Fulgides	168
4.3.4.1. Absorption Spectra of Fulgide 62 and its Colored Form (63)	169
4.3.4.2. The Effect of Solvent Polarity on the Absorption Spectra of Fulgide 62 and its Colored Form (63)	171
4.3.4.3. Substituent Effects on the Absorption Spectra of Pyrrolyl Fulgide 62 and Colored Forms (63)	173
4.3.4.4. Crystal Structure of Fulgide 62n	173
4.3.5. Heteroaromatic Fulgides Containing two Hetero Atoms	174
4.4. Fulgimides, Isofulgimides, Fulgenates, Fulgenolides and Dicyano- methylene Derivatives of Fulgides	176
4.4.1. Fulgimides	176
4.4.2. Isofulgimides	180
4.4.3. Fulgenates and Fulgenolides	180
4.4.4. Tetrahydrofuran-2-one Derivatives	183
4.5. Photochromic Mechanism	185
4.5.1. Chromophores and Excited States of Fulgides	185
4.5.2. E $\rightarrow$ Z Isomerization	186

4.5.3. Photocyclization Reactions of Fulgides and Derivatives	190
4.5.4. Heliobromic Reaction	194
4.6. Applications of Fulgides and their Derivatives	195
4.6.1. Optical Storage	195
4.6.2. Actinometry	197
4.6.3. Photochromic Inks, Paints and Fabrics	197
4.6.4. Applications in Other Advanced Materials	197
4.7. Some Examples of Detailed Syntheses	198
4.8. References	201

5. Diarylethenes with Heterocyclic Aryl Groups

Masahiro Irie

5.1. Introduction	207
5.2. Synthesis	208
5.2.1. Diarylperfluorocyclopentenes	208
5.2.2. Diarylmaleic Anhydrides	208
5.3. Properties	209
5.3.1. Thermal Stability	209
5.3.2. Fatigue-Resistant Character	209
5.3.3. Absorption Spectra	211
5.3.4. Response Time	217
5.4. Molecular Systems with Controlled Functionality	218
5.4.1. Gated Reactivity	218
5.4.2. Photoswitching of Electrochemical Properties	219
5.5. Conclusion	220
5.6. References	221

6. Photochromism of Dihydroindolizines and Related Systems

Heinz Dürr

6.1. Introduction	223
6.2. Syntheses of Photochromic Molecules Based on a 1,5-Electrocyclic Reaction	224
6.2.1. Type 2 System	226
6.2.1.1. Cyclopropene: Route (a)	226
6.2.1.2. Pyrazole Route (b)	227
6.2.1.3. Retro-1,5-Electrocyclization: Route (c)	227
6.2.1.4. Diazo: Route (d)	228
6.2.2. Tetrahydro- and Hexahydroindolizines	228
6.2.3. Biphotochromic Systems	228
6.2.3.1. Route 1: Type a and Type b Systems	229
6.2.3.2. Type c Systems	229

6.3. Photochromic Systems with One Heteroatom	231
6.3.1. Spectra of the Colorless and the Colored Forms	231
6.3.2. Spectra of Colored Forms	233
6.3.3. Solvent Effects on the Colored Forms	234
6.3.4. Thermal Reactions in Solution/Structure—Fading Rate Relationships	235
6.3.5. Modified Systems: Tetra and Hexahydroindilazines	238
6.3.6. Mechanism of Photocoloration	238
6.3.7. Quantum Yield of Photocoloration and Photobleaching	239
6.4. Photochromic Systems Based on Pentadienyl Anions with Two Heteroatoms	240
6.4.1. Type 1,2 Systems	240
6.4.2. Type 2,3 Systems	241
6.5. Photochromic Systems Based on Pentadienyl Anions with Three Heteroatoms	242
6.6. Supramolecular and Environmental Effects and Applications	243
6.6.1. Supramolecular Systems	243
6.6.2. Photochromic Systems in Liquid Crystalline Phase	245
6.6.3. Photochromic Systems in Polymers	246
6.6.3.1. DHI Dissolved in Polymers	247
6.6.3.2. Polymer-Linked Systems	250
6.6.4. IR-Sensitive Materials	253
6.7. Description of Apparatus	255
6.8. Syntheses of Key Examples	259
6.9. Conclusions	263
6.10. References	263

7. Photochromic Quinones

Valeri Barachevsky

7.1. Introduction	267
7.2. Synthesis of Photochromic Quinones	268
7.2.1. Methylanthraquinone	269
7.2.2. Derivatives of Anthraquinone	269
7.2.3. Derivatives of Naphthacenequinone	270
7.2.4. Phenoxypentacenequinone and Derivatives of Phthaloylpyrene . .	273
7.3. Mechanism of Photochromic Transformations in Quinones	274
7.3.1. Photochromism of Naphthoquinone	274
7.3.2. Photochromism of Anthraquinones	275
7.3.2.1. Alkylanthraquinones	275
7.3.2.2. Acyloxyanthraquinones	276
7.3.2.3. Aryloxyanthraquinones	278
7.3.2.4. Anthrapyridones and Anthrapyridines	283
7.3.2.5. Pyrazoloanthrones	284

Table of Contents	xxi
7.3.3. Photochromism of Naphthacenequinones	285
7.3.3.1. Aryloxynaphthacenequinones	285
7.3.3.2. Naphthacenepyridones and Naphthacenepyridines	288
7.3.3.3. Pyrone	288
7.3.3.4. Pyrazolonaphthacenes	288
7.3.4. Photochromism of Phenoxypentacenequinone and Derivatives of Phthaloylpyrene	289
7.4. Photochromic Behavior of Quinones	291
7.4.1. Spectral Characteristics	291
7.4.2. Kinetic Characteristics	298
7.4.2.1. Methylnaphthoquinone	298
7.4.2.2. Derivatives of Anthraquinone	299
7.4.2.3. Derivatives of Naphthacenequinone	302
7.4.3. Fatigue	304
7.4.3.1. Methylnaphthoquinone	304
7.4.3.2. Derivatives of Anthraquinone	304
7.4.3.3. Derivatives of Naphthacenequinone	306
7.5. Applications of Photochromic Quinones	307
7.5.1. Recording and Multiplication of Images	308
7.5.2. Optical Memory	308
7.5.3. Gradation Masking	309
7.6. Conclusion	309
7.7. Examples of Synthesis of Photochromic Quinones	310
7.7.1. 1-Phenoxy-2,4-dioxy and 1-(<i>p tert</i> -butyl)phenoxy-2,4- dioxyanthraquinones	310
7.7.2. 6-Phenoxy-5,12-naphthacenequinone	310
7.7.3. 6-Phenoxy-5,12-pentacenequinone	310
7.7.4. 1,3-Dichloro-6-phenoxy-7,12-phthaloylpyrene	310
7.8. References	311

8. Perimidinespirocyclohexadienones

Vladimir Minkin, Vitaly Komissarov, and Vladimir Kharlanov

8.1. Introduction	315
8.2. Synthesis and Reactions	317
8.3. Spectral and Photochromic Properties	323
8.4. Thermal Decoloration Reaction	328
8.5. Thermo- and Solvatochromism	329
8.6. Integrated Photochromic and Electrochromic Properties.	332
8.7. Photoinitiated Interconversion of Ring-Chain Isomers of bis-Quinone Imines Derived from Aromatic Diamines	334
8.8. Preparative Procedures	337
8.8.1. 2,3-Dihydro-2-spiro-4'-(2',6'-di- <i>tert</i> -butylcyclohexadien-2',5'- one) perimidine, 1a (R = H)	337

8.8.2.	1-Methyl-2,3-dihydro-2-spiro-4'-(2',6'-di- <i>tert</i> -butylcyclohexadien-2',5'-one) perimidine, 1a (R=CH ₃)	338
8.8.3.	2,3-Dihydro-2-spiro-4'-[(4 <i>H</i>)-2',- <i>tert</i> -butylnaphthalen-1'-one]perimidine, 4 (R,R',RR''=H)	338
8.8.4.	5,7,9-Trimethyl-2,3-dihydro-2-spiro-4'-(2',6'-di- <i>tert</i> -butylcyclohexadien-2',5'-one)-pyrido-[4,3,2- <i>d,e</i>]quinazoline, 9 (R'=H, R=Me, Ar=H)	338
8.9.	References	339

9. Photochromism by Electron Transfer: Photochromic Viologens

Masata Nanasawa

9.1.	Introduction to Photochromism by Electron Transfer	341
9.2.	Photochromism of Viologens	342
9.2.1.	Introduction	342
9.2.2.	General Synthetic Methods	344
9.2.3.	Photochromic Behavior	345
9.2.3.1.	Effect of Matrices on Photochromism	345
9.2.3.2.	A Variety of Color Species of Viologens.	349
9.2.3.3.	Photochromism of Molecular Assembly	351
9.2.3.4.	Viologen Bearing a Metal Complex as Counteranion	354
9.2.4.	Applications	358
9.3.	Photochromism of Thiazines	362
9.3.1.	Introduction	362
9.3.2.	Photochromic Properties	362
9.3.3.	Applications	364
9.3.3.1.	Thiazine Dyes	364
9.3.3.2.	Effect of the Kind of Reductants	365
9.3.3.3.	Effect of Coating Substrate	365
9.4.	References	367
	Index	371
