

CONTENTS

Chapter 1

NUCLEON CHARGE-EXCHANGE REACTIONS AT INTERMEDIATE ENERGY

W. P. Alford and B. M. Spicer

1. Introduction	2
2. Early Results in the Study of Spin and Isospin Excitations	3
2.1. Beta Decay	3
2.2. Direct Nuclear Reactions	4
2.3. Early Investigations of Charge-Exchange (Isovector) Interactions	6
2.4. Giant Resonances and Sum Rules	9
3. Experimental Facilities	13
3.1. (p, n) Reactions	13
3.2. (n, p) Reactions	16
3.3. Other Reactions	18
4. Measurement of GT Strength	24
4.1. Direct Determination	24
4.2. Comparison with Fermi Transitions	29
5. Gamow—Teller Giant Resonance	31
5.1. Strength Distribution	31
5.2. Transition Strength — The Missing Strength Problem	33
5.3. β_+ Strength and the (n, p) Reaction	37
5.4. Experimental Results of GT Studies	38
6. Multipole Analysis: GT Strength at Higher Excitation Energy	42

7.	Spin Dipole and Higher Multipole Transitions	49
7.1.	Spin Dipole Transitions	52
7.2.	$L = 2$ Strength	56
7.3.	An Attempt at Systematics for the $L = 1$ and $L = 3$ Transitions	61
7.4.	Stretched States	63
8.	Quasielastic Scattering	65
8.1.	Spectral Shapes	65
8.2.	Nuclear Response Functions	67
9.	Summary	71
	References	74

Chapter 2

MESONIC CONTRIBUTIONS TO THE SPIN AND FLAVOR STRUCTURE OF THE NUCLEON

J. Speth and A. W. Thomas

1.	Introduction	84
2.	Elementary Ideas of Deep-Inelastic Scattering	85
2.1.	Scaling Violations	88
2.2.	Features of Nucleon Data	90
3.	Sullivan Processes	92
3.1.	The Convolution Model	93
3.2.	Calculation of the Probability Amplitudes ϕ_{BM} in TOPT	96
3.3.	Meson–Baryon Form Factors	99
3.4.	Spin-Averaged Splitting Functions	100
3.5.	TOPT versus Covariant Perturbation Theory	102
3.6.	Polarized Splitting Functions	105
4.	Meson Cloud and the Non-Perturbative Sea	108
4.1.	Meson–Baryon Form Factors derived from Semi-Inclusive pp -Reactions	109
4.2.	Sea-Quark Distributions of the Nucleon	111
4.3.	Gottfried Sum Rule and the $\bar{u} - \bar{d}$ Asymmetry	114
4.4.	Drell–Yan Processes and $\bar{u} - \bar{d}$ Asymmetry	118
4.5.	Polarized Semi-Inclusive Deep-Inelastic Scattering	126

4.6. Exclusive Electroproduction of Pions	128
4.7. Meson-Cloud Effects on the Spin-dependent Properties of the Nucleon	131
5. Mesons in the Proton as Targets for Deep-Inelastic Scattering	138
6. Conclusion	143
A. Lagrangians	144
B. Vertex Functions	145
References	147

*Chapter 3***MUON CATALYZED FUSION: INTERPLAY BETWEEN NUCLEAR AND ATOMIC PHYSICS****K . Nagamine and M . Kamimura**

1. Introduction	151
2. Nuclear Fusion Reaction inside Muon Molecule	157
3. Muon Sticking after Nuclear Fusion	164
4. Atomic and Molecular Processes before and after Fusion	172
4.1. Hydrogen Muonic Atom Slowing-Down	172
4.2. Muon Transfer among Hydrogen Isotopes	174
4.3. Formation of the Muon Molecule	177
4.4. He Impurity Effect	190
5. Energy Production of Muon Catalyzed Fusion	194
6. Further Application of Muon Catalyzed Fusion	198
6.1. 14 MeV Neutron Source	198
6.2. Slow μ^-	199
7. Conclusions and Future Perspectives	201
References	203
<i>Index</i>	207
