

CONTENTS

| | |
|--|-------------|
| Preface | xiii |
| 1 ANGULAR MOMENTUM OPERATORS AND THEIR MATRIX ELEMENTS | 1 |
| 1.1 Quantum Mechanical Definition | 1 |
| 1.2 Physical Interpretation of Angular Momentum Vector | 2 |
| 1.3 Raising and Lowering Operators | 3 |
| 1.4 Spectrum of Eigenvalues | 4 |
| 1.5 Matrix Elements | 5 |
| 1.6 Angular Momentum Matrices | 6 |
| Review Questions | 8 |
| Problems | 8 |
| Solutions to Selected Problems | 9 |
| 2 COUPLING OF TWO ANGULAR MOMENTA | 10 |
| 2.1 The Clebsch-Gordan Coefficients | 10 |
| 2.2 Some Simple Properties of C.G. Coefficients | 11 |
| 2.3 General Expressions for C.G. Coefficients | 13 |
| 2.4 Symmetry Properties of C.G. Coefficients | 14 |
| 2.5 Iso-Spin | 15 |
| 2.6 Notation | 16 |
| Review Questions | 16 |
| Problems | 17 |
| Solutions to Selected Problems | 19 |
| 3 VECTORS AND TENSORS IN SPHERICAL BASIS | 24 |
| 3.1 The Spherical Basis | 24 |
| 3.2 Scalar and Vector Products in Spherical Basis | 26 |
| 3.3 The Spherical Tensors | 27 |
| 3.4 The Tensor Product | 29 |
| Review Questions | 30 |
| Problems | 31 |
| Solutions to Selected Problems | 31 |

| | |
|--|-----------|
| 4 ROTATION MATRICES - I | 34 |
| 4.1 Definition of Rotation Matrix | 34 |
| 4.2 Rotation in terms of Euler Angles | 34 |
| 4.3 Transformation of a Spherical Vector under Rotation of Coordinate System | 35 |
| 4.4 The Rotation Matrix D1 (α, β, γ) | 38 |
| 4.5 Construction of other Rotation Matrices | 38 |
| Review Questions | 39 |
| Problems | 39 |
| Solutions to Selected Problems | 39 |
| 5 ROTATION MATRICES - II | 42 |
| 5.1 The Rotation Operator | 42 |
| 5.2 The $d_{m'm}^{\beta}(\beta)$ Matrix | 44 |
| 5.3 The Rotation Matrix for Spinors | 45 |
| 5.4 The Clebsch-Gordan Series | 48 |
| 5.5 The Inverse Clebsch-Gordan Series | 49 |
| 5.6 Unitarity and Symmetry Properties of the Rotation Matrices | 50 |
| 5.7 The Spherical Harmonic Addition Theorem | 52 |
| 5.8 The Coupling Rule for the Spherical Harmonics | 54 |
| 5.9 Orthogonality and Normalization of the Rotation Matrices . | 56 |
| Review Questions | 57 |
| Problems | 58 |
| Solutions to Selected Problems | 58 |
| 6 TENSOR OPERATORS AND REDUCED MATRIX ELEMENTS | 61 |
| 6.1 Irreducible Tensor Operators | 61 |
| 6.2 Racah's Definition | 61 |
| 6.3 The Wigner-Eckart Theorem | 63 |
| 6.4 Proofs of the Wigner-Eckart Theorem | 65 |
| 6.4.1 Method I | 65 |
| 6.4.2 Method II | 67 |
| 6.4.3 Method III | 69 |
| 6.5 Tensors and Tensor Operators | 72 |
| Review Questions | 74 |
| Problems | 75 |
| Solutions to Selected Problems | 75 |
| 7 COUPLING OF THREE ANGULAR MOMENTA | 77 |
| 7.1 Definition of the U-Coefficient | 77 |
| 7.2 The U-Coefficient in terms of C.G. Coefficients | 78 |

| | | |
|-----------|---|------------|
| 7.3 | Independence of U-Coefficient from Magnetic Quantum Numbers | 79 |
| 7.4 | Orthonormality of the U-Coefficients | 80 |
| 7.5 | The Racah Coefficient and its Symmetry Properties | 81 |
| 7.6 | Evaluation of Matrix Elements | 82 |
| | Review Questions | 85 |
| | Problems | 85 |
| | Solutions to Selected Problems | 85 |
| 8 | COUPLING OF FOUR ANGULAR MOMENTA | 88 |
| 8.1 | Definition of LS-jj Coupling Coefficient | 88 |
| 8.2 | LS-jj Coupling Coefficient in terms of C.G. Coefficients | 89 |
| 8.3 | Independence of the LS-jj Coupling Coefficients from the Magnetic Quantum Numbers | 91 |
| 8.4 | Simple Properties | 92 |
| 8.5 | Expansion of 9-j Symbol into Racah Coefficients | 93 |
| 8.6 | Evaluation of Matrix Elements | 95 |
| | Review Questions | 96 |
| | Problems | 96 |
| | Solutions to Selected Problems | 97 |
| 9 | PARTIAL WAVES AND THE GRADIENT FORMULA | 100 |
| 9.1 | Partial Wave Expansion for a Plane Wave | 100 |
| 9.2 | Distorted Waves | 102 |
| 9.3 | The Gradient Formula | 103 |
| 9.4 | Derivation of the Gradient Formula | 105 |
| 9.5 | Matrix Elements Involving the ∇ Operator | 108 |
| | Review Questions | 112 |
| | Problems | 113 |
| | Solutions to Selected Problems | 114 |
| 10 | IDENTICAL PARTICLES | 119 |
| 10.1 | Fermions and Bosons | 119 |
| 10.2 | Two Identical Fermions in j-j Coupling | 119 |
| 10.3 | Construction of Three-Fermion Wave Function | 120 |
| 10.4 | Calculation of Fractional Parentage Coefficients | 123 |
| 10.5 | The Iso-Spin | 125 |
| 10.6 | The Bosons | 126 |
| 10.7 | The m-scheme | 126 |
| | Review Questions | 128 |
| | Problems | 128 |
| | Solutions to Selected Problems | 129 |

| | |
|--|------------|
| 11 DENSITY MATRIX AND STATISTICAL TENSORS | 130 |
| 11.1 Concept of the Density Matrix | 130 |
| 11.2 Construction of the Density Matrix | 133 |
| 11.3 Fano's Statistical Tensors | 134 |
| 11.4 Oriented and Non-Oriented Systems | 139 |
| 11.5 Application to Nuclear Reactions | 140 |
| Review Questions | 144 |
| Problems | 145 |
| Solutions to Selected Problems | 146 |
| 12 PRODUCTS OF ANGULAR MOMENTUM MATRICES AND THEIR TRACES | 150 |
| 12.1 General Properties | 150 |
| 12.2 Evaluation of $\text{Tr } J_z^{2p}$ | 152 |
| 12.3 Evaluation of $\text{Tr } (J_-^k J_+^k)$ | 155 |
| 12.4 Recurrence Relations for $\text{Tr } (J_-^k J_z^l J_+^k)$ | 157 |
| 12.5 Some Simple Applications | 158 |
| 12.5.1 Statistical tensors | 158 |
| 12.5.2 Construction of T_k^k | 159 |
| 12.5.3 Analytical expression for $(J_-^k J_+^k)$ | 160 |
| 12.5.4 Elastic scattering of particles of arbitrary spin | 161 |
| Review Questions | 162 |
| Problems | 162 |
| Solutions to Selected Problems | 163 |
| 13 THE HELICITY FORMALISM | 165 |
| 13.1 The Helicity States | 165 |
| 13.2 Two-Particle Helicity States | 171 |
| 13.3 Scattering of Particles with Spin | 172 |
| 13.3.1 Scattering cross section | 172 |
| 13.3.2 Invariance under parity and time reversal | 175 |
| 13.3.3 Polarization studies | 176 |
| 13.4 Two-Body Decay | 181 |
| 13.5 Muon Capture | 191 |
| Review Questions | 195 |
| Problems | 195 |
| Solutions to Selected Problems | 196 |
| 14 THE SPIN STATES OF DIRAC PARTICLES | 199 |
| 14.1 The Dirac Equation | 199 |
| 14.2 Orthogonal and Closure Properties | 201 |
| 14.3 Sum Over Spin States | 203 |

| | |
|--|-----|
| 14.4 In Feynman's Notation | 206 |
| 14.5 A Consistency Check | 209 |
| 14.6 Algebra of γ Matrices | 210 |
| Review Questions | 213 |
| Problems | 213 |
| Solutions to Selected Problems | 213 |
| Appendix A | |
| Equivalence of Rotation About an Arbitrary Axis to Euler Angles of Rotation | 216 |
| Appendix B | |
| Tables of Clebsch-Gordon Coefficients | 224 |
| Appendix C | |
| Tables of Racah Coefficients | 225 |
| Appendix D | |
| Spherical Harmonics | 227 |
| Appendix E | |
| The Spherical Bessel and Neumann Functions | 230 |
| Appendix F | |
| The Bernoulli Polynomials | 232 |
| Appendix G | |
| List of Symbols and Notation | 234 |
| References | |
| Subject Index | |
| | 238 |
| | 241 |
