Chapter 1. Epidemiology, Manifestations, and Treatment of HIV Infection in Women 1

Dawn K. Smith and Janet S. Moore

The Epidemiology of HIV/AIDS in Women	1
Extent of the Epidemic	1
Characteristics of Women with HIV Disease	3
Modes of Exposure of Women to HIV	4
Manifestations of HIV Infection in Women	7
Disease Manifestations: Non-AIDS-Defining Conditions	7
Disease Manifestations: AIDS-Defining Conditions	10
Disease Course: Rate of Progression	11
Disease Course: Survival	12
Health Care Issues for Women with HIV Infection	13
Identification of HIV Infection in Women	14
Access to and Use of Health Care Services	16
Treatment of HIV Infection in Women	18
Conclusions	22
References	24

Chapter 2. Psychosocial Stress and Adaptation Processes for Women Coping with HIV/AIDS 33

Sharon Rae Jenkins and Helen L. Coons

Women, Gay Men, and HIV	34
The Psychosocial Context of HIV in Women's Lives	39
Women Coping with Illness	42
Stressors	43
Coping	43
Social Support	46
Women Confronting HIV Infection	48

Schemas of Psychological Aspects of HIV Disease Progression . . .	48
HIV Testing	49
Receiving a Seropositive Diagnosis	53
Progression to AIDS	59
Studies of Stress, Coping, Social Support. and Adaptation	63
Studies of Both Genders	63
Studies of Women	65
Future Research and Treatment Priorities	69
Research	69
Treatment	71
References	72
 Chapter 3. Intervening with Adolescent Girls Living with HIV	 87
<i>Mary Jane Rotheram-Borus. Debra A. Murphy.</i>	
<i>and Sutherland Miller</i>	
Epidemiology	87
Identification of HIV+ Youths	91
Adaptation to Living with HIV	94
Intervention Context and Components	96
Content of the Intervention	99
Summary	103
References	104
 Chapter 4. Drug-Using Women and HIV: Access to Care and	
Treatment Issues	109
<i>Gloria Weissman and Vivian Brown</i>	
Introduction	109
HRSA/NIDA Study	111
Sample Characteristics	112
HIV Risk Behaviors	112
HIV Testing	113
Service Utilization and Access Barriers	113
Overcoming Barriers to Care	114
Outreach as the First Step in Access	115
The Role of Substance Abuse Treatment	115
Care Coordination and Case Management	116
HIV Testing	117
Need for Advocacy	118

Contents	xiii
Current Research Priorities	119
Conclusion	119
References	120
 Chapter 5. “Selective Kin”: Defining the Caregivers and Families of Children with HIV Disease	 123
<i>Claude Ann Mellins, Anke A. Ehrhardt, Lucile Newman, and Michael Conard</i>	
Introduction	123
Selective Kin	125
Family Studies Project	126
Method	126
Selective Kin Configurations	127
Selective Kin Configurations, Stress, and Coping	135
Factors Influencing “Selective Kin” Structures	139
Ethnicity	139
Poverty	140
Substance Use	141
Homosexuality	141
HIV Orphans	142
Discussion	143
Policy Implications	146
Conclusion	147
References	147
 Chapter 6. Clinical and Psychosocial Issues of Women with HIV/AIDS	 151
<i>Stacy N. Broun</i>	
Safe-Sex Behavior for Women	152
Lesbians Can Get AIDS?	153
Denial about Women and AIDS	154
Cultural and Ethnospecific Factors	154
Women as Caregivers	155
Treatment Goals	156
Treatment across the HIV Spectrum	157
General Considerations in Treatment of HIV Patients	157
Treatment Goals over the Course of HIV Disease	161
Getting Tested	161

Early Intervention	161
Behavior Changes	162
Middle Stages of HIV	162
Later Stages of the Illness	163
Rational Suicide	164
Rewards of This Work	165
References	165

Chapter 7. Women's Reproductive Decisions in the Context of HIV Infection 167

John B. Jemmott III and Suzanne Miller

Women, Children, and HIV	168
HIV Serostatus and Reproductive Behavior	170
HIV Serostatus and Pregnancy Decisions	170
HIV Serostatus and Pregnancy Termination and Continuation	172
Social–Psychological Factors and Reproductive Decisions in the Context of HIV	175
Discussion	179
References	182

Chapter 8. The Design, Participants, and Selected Early Findings of the HIV Epidemiology Research (HER) Study: A Prospective Cohort Study of the Impact of HIV Infection on the Health of American Women 185

*Dawn K. Smith, Dora Warren, Liza Solomon, Paula Schuman,
Michael Stein, Barbara Greenberg, and Janet S. Moore for the
HER Study Group*

Introduction	185
Recruitment	187
Core Visit Protocols	189
Core Interviews	189
Physical Exam	190
Specimen/Test Data Collection	190
Psychosocial Interview	191
CD4 <100 Visits	191
Participant Safety and Confidentiality	192
Medical Record Abstraction	192
Quality Control	192

Data Management	193
Sample Characteristics and Early Findings	193
Demographics	193
Early Findings	195
Biomedical Findings	195
Health Care Findings	196
Behavioral and Psychosocial Findings	197
Sexual Behavior	199
Drug Use	199
Future Plans	200
Discussion	201
References	202
 Chapter 9. For Whose Benefit? Women and AIDS Public Policy . . .	207
<i>Kathleen A. Ethier, Jeannette R. Ickovics, and Judith Rodin</i>	
HIV Prevention	209
HIV Counseling and Testing	211
Access to Care	216
Coordinated Services and Quality of Care	218
Women's Inclusion in Research	220
Access to Clinical Trials	221
Conclusion	223
