INTRODUCTION	1
1. DIAGNOSTIC CRITERIA: A HISTORICAL PERSPECTIVE	5
Previous Descriptions and Labels	6
Current Diagnostic Criteria	14
Conclusion	21
2. PRIMARY CHARACTERISTICS AND ASSOCIATED FEATURES ...	25
Primary Symptoms	25
Etiology	30
Epidemiology	36
Developmental Considerations	41
Psychosocial Impact and Comorbidity	45
Conclusion	58
3. IMPLICATIONS FOR ASSESSMENT	59
Impact of <i>DSM-IV</i> Criteria on Assessment	59
Impact of AD/HD Research Findings on Assessment	64
Conclusion	72
4. ASSESSMENT PROCEDURES	73
Interviews	73
Rating Scales	82
Psychological Tests	106
Direct Observational Procedures	115
Medical Evaluations	118
Conclusion	119

5. ESTABLISHING A DIAGNOSIS	121
Selecting Assessment Procedures	121
Collecting Assessment Data	129
Interpreting Assessment Data	132
Putting the Pieces Together	149
Case Examples	152
Conclusion	168
6. PLANNING TREATMENT	171
Empirically Supported Treatments	171
From Research to Practice	176
Tailoring Treatment Options	177
Planning Collaboratively with Parents	181
Developing a Plan	183
Conclusion	187
7. PROVIDING FEEDBACK	189
Providing Feedback to Parents and Children	190
Communicating with Others	199
Written Reports	200
Conclusion	213
8. ASSESSING TREATMENT OUTCOME	215
Assessing Treatment Efficacy	215
Evaluating Pharmacological Treatment	226
Evaluating School-Based Treatment	239
Evaluating Home-Based Treatment	250
Conclusion	258
