Preface	xiii
The Editors	xiv
Aims & Scope of <i>Developments in Paleoenvironmental Research</i> Book Series....	xv
Editors and Board of Advisors of <i>Developments in Paleoenvironmental Research</i> Book Series	xvi
Contents of Volumes 1 to 4 of the Series	xvii
Safety Considerations and Caution	xx
List of Contributors	xxi
 1. An introduction to physical and geochemical methods used in paleolimnology. <i>William M. Last & John P. Smol</i>	 1
 Part I: Physical Lithostratigraphy Techniques	
2. Recognition and analysis of bedding and sediment fabric features. <i>Alan E. S. Kemp, Jean Dean, Richard B. Pearce & Jennifer Pike</i>	7
Introduction	
Approach	
Photography and imagery of the core surface	
Penetrative imaging of the core	
Sampling wet, unconsolidated or semi-consolidated sediment	
Sediment drying and resin-embedding	
Thin section preparation	
SEM analysis of laminated sediment	
Summary	
Acknowledgements	
Appendix 1: Fluid displacive low viscosity resin embedding technique	
Method	
References	
 3. Image analysis techniques. <i>Timo Saarinen & Gunilla Petterson</i>	23
Introduction	
Image analysis in paleolimnology	
Material and methods	
Future perspectives	
Conclusion	
Summary	
Acknowledgements	
References	

4. Textural analysis of lake sediments. *William M. Last*41

Introduction and importance of texture
 Size
 Form and fabric
 Example of application of textural studies
 Summary
 Acknowledgments
 References

Part II: Mineralogical and Geochemical Indicator Techniques

5. Inorganic geochemical methods in paleolimnology. *J. F. Boyle*83

History & scope
 Objectives of inorganic geochemical research
 Elemental analysis
 Identifying, characterizing, and quantifying sediment components
 Areas of contention
 Uses of inorganic geochemical data in palaeolimnology
 Future developments
 Summary
 Acknowledgements
 References

6. Mineralogical analysis of lake sediments. *William M. Last* 143

Introduction and importance of mineralogy
 Mineralogy versus geochemistry
 Minerals in lake sediments
 A synopsis of methods
 X-ray diffraction
 Light microscopy
 Future developments
 Summary
 Acknowledgments
 References

7. Fluid inclusions in paleolimnological studies of chemical sediments.
Tim Lowenstein & Sean T. Brennan 189

Introduction
 Distinguishing primary from secondary features in chemical sediments
 Fluid inclusions in ancient chemical sediments
 Fluid inclusion liquid-vapor homogenization temperatures:
 paleolake temperatures

Fluid inclusion freezing-melting behavior: paleolake chemical compositions
 Stable isotopes (δD , $\delta^{18}O$) from fluid inclusion waters
 Major element chemistry of fluid inclusions: paleolake water compositions
 Summary
 Acknowledgements
 References

8. Application of mineral magnetic techniques to paleolimnology.
Per Sandgren & Ian Snowball 217

Introduction
 A brief history of the application of mineral magnetic measurements
 to lake sediments
 Magnetic properties
 Magnetic hysteresis
 Anhysteretic remanent magnetisation (ARM)
 Sample collection and preparation
 Sequence of measurements
 Hysteresis curves
 Summary
 References

9. Sediment organic matter.
Philip A. Meyers & Jane L. Teranes 239

Introduction
 Paleolimnological proxies
 Summary
 Acknowledgments
 References

10. Paleolimnological methods and applications for persistent organic pollutants.
Jules M. Blais & Derek C. G. Muir 271

Introduction
 Advances in extraction and quantitative analytical techniques for POPs
 in sediment
 Transfer processes in lakes
 Summary
 Acknowledgments
 References

11. Near-Infrared spectrometry (NIRS) in paleolimnology.
Tom Korsman, Ingemar Renberg, Eigil Dâbakk & Mats B. Nilsson 299

Introduction	
Theory	
Instrumentation	
NIR analysis of sediment samples	
Uses of NIRS in palaeolimnology	
Future perspectives	
Summary	
References	
12. Fly-ash particles. <i>Neil Rose</i>	319
Introduction	
A brief history	
Methods of extraction and enumeration	
Temporal distribution	
Spatial distribution	
Source apportionment	
The future	
Summary	
Acknowledgements	
References	
 Part III: Stable Isotope Techniques	
13. Application of stable isotope techniques to inorganic and biogenic carbonates. <i>Emi Ito</i>	351
Introduction	
Nomenclature and systematics	
$\delta^{18}\text{O}$ of lake-water	
Mg/Ca and Sr/Ca ratios of lake-water	
$\delta^{13}\text{C}$ of dissolved inorganic carbon (DIC)	
Carbonates in lake-sediments	
Mollusks	
Ostracodes	
Charaphytes	
Isotope analysis	
Preparation of carbonate samples for isotope analysis	
Conclusions	
Summary	
Acknowledgments	
References	
14. Carbon and oxygen isotope analysis of lake sediment cellulose: methods and applications. <i>Brent B. Wolfe, Thomas W. D. Edwards, Richard J. Elgood & Kristina R. M. Beuning</i>	373

Introduction	
Stable isotope tracers in lake waters - ^{18}O , ^2H , ^{13}C	
Historical development	
Methods	
Key criteria for paleohydrologic reconstruction	
Applications	
Future research directions	
Summary	
Acknowledgements	
References	
15. Nitrogen isotopes in palaeolimnology. <i>Michael R. Talbot</i>	401
Introduction	
Nitrogen in lakes: forms and distribution	
Nitrogen isotopes	
Nitrogen isotope studies in palaeolimnology: sampling and measurement	
Some examples	
Closing remarks	
Summary	
Acknowledgments	
References	
Glossary, acronyms and abbreviations	441
Index	493
