<b>Preface .....</b>	<b>ix</b>
<b>Introduction .....</b>	<b>xi</b>

## **Incorporating Behavioural, Social, and Organizational Phenomena in the Assessment of Climate Change Mitigation Options**

<i>John A. “Skip” Laitner, Stephen J. DeCanio, Irene Peters.....</i>	<b>1</b>
1. Introduction .....	1
2. The current framework .....	2
2.1. Description of current framework .....	2
2.2. A general critique of the current framework .....	5
2.3. Implications for current climate change policy assessment .....	36
3. Improving the current framework .....	39
3.1. A schematic illustration of policy and organizational perspectives.....	39
3.2. Short-term improvements in climate policy modelling .....	41
3.3. Longer term modelling advances .....	46
4. Epilogue: Inventing the future .....	48
5. References .....	51

## **Cultural Discourses in the Global Climate Change Debate**

<i>Steven Ney, Michael Thompson.....</i>	<b>65</b>
1. Introduction .....	65
2. Policy Arguments and Policy Stories .....	66
3. Three Stories About Global Climate Change.....	71
4. Policy Implications.....	75
5. Scenario Planning: One Tool from the Appropriate Policy Tool-Kit .....	77
6. References .....	91

## **Consumption, Motivation And Choice Across Scale: Consequences For Selected Target Groups**

<i>Michael Thompson .....</i>	<b>93</b>
1. The Rules Of The Cultural Method .....	93
2. How, then, <i>does</i> culture matter? .....	95
3. Some Applications Of The Cultural Method .....	101
4. References .....	107

## **The Legacy of Twenty Years of Energy Demand Management: we know more about Individual Behaviour but next to Nothing about Demand**

<i>Harold Wilhite, Elizabeth Shove, Loren Lutzenhiser, Willett Kempton.....</i>	<b>109</b>
1. Introduction .....	109
2. Energy and the social sciences .....	110

2.1. Device-centered approaches to understanding energy use.....	110
2.2. Bringing the social sciences to bear on energy policy research .....	111
2.3. A limited social science contribution .....	112
3. The problems of reducing the role of social science to that of understanding the end-user's "efficiency" behaviour.....	113
3.1. The individual as the locus of control and change .....	114
3.2. Overcoming the barriers .....	114
3.3. Energy consuming behaviour or the consumption of energy services? .....	115
4. Demanding a new agenda?.....	117
4.1. Re-positioning debate.....	118
4.2. Re-formulating questions.....	119
4.3. Re-tooling research .....	121
4.4. Re-thinking policy .....	122
5. Conclusions .....	123
6. References .....	123

### **Group Identity, Personal Ethics and Sustainable Development Suggesting New Directions For Social Marketing Research**

<i>Johanna Moisander</i> .....	127
1. Introduction .....	127
2. Experimentalist approach to social behaviour: group identity and personal ethics as intrapersonal variables .....	130
3. Group identity and personal ethics as motives for environmentally responsible consumption .....	132
4. 'Green consumer' as a group identity .....	135
4.1. Conceptualization of the green consumer.....	135
4.2. Myriad ways of thinking, being, and acting green .....	136
5. Morality, rationality and green consumerism.....	139
5.1. Personal ethics and green consumerism .....	140
5.2. The 'rationality' of environmentally moral behaviour.....	141
5.3. Personal environmental ethics as an existential choice.....	143
5.4. Suggested future directions for environmental policy oriented research .....	145
6. Appendix .....	148
7. References .....	151

### **European Narratives about Human Nature, Society and the Good Life**

<i>Laurie Michaelis</i> .....	157
1. Introduction .....	157
2. Cultural Narratives and Traditions .....	158
2.1. Modernism.....	160
2.2. Romanticism.....	163
2.3. Humanism .....	164
2.4. Other traditions .....	164
3. Views on climate change from the traditions .....	165

4. Where next?.....	166
5. References .....	167

## **Gender-Specific Patterns of Poverty and (Over-)Consumption in Developing and Developed Countries**

<i>Minu Hemmati</i> .....	<b>169</b>
1. Introduction .....	169
2. Concepts .....	170
3. Issues & Research.....	173
3.1. Poverty and (Over-)Consumption .....	174
3.2. Consumption and Gender.....	175
3.3. Consumption Choices By Women and Men .....	176
3.4. Energy Consumption.....	177
3.5. Transport.....	178
3.6. Environmental Degradation .....	180
3.7. Measures of Environmental Protection .....	181
3.8. Consumer Awareness and Behaviour Concerning Environmental Problems.....	181
4. Points for Discussion and Future Work.....	183
5. References .....	187

## **Climate Change and Relative Consumption**

<i>Richard B. Howarth</i> .....	<b>191</b>
1. Introduction .....	191
2. The Dice Model: Base Specification .....	193
3. Relative Consumption Effects.....	195
3.1. Competitive Equilibrium.....	197
3.2. Optimal Taxation .....	198
3.3. Numerical Simulations.....	200
4. Summary and Conclusions.....	204
5. References .....	205

## **Social interactions and conditions for change in energy-related decision-making in SMCs – an empirical socio-economic analysis**

<i>Stephan Ramesohl</i> .....	<b>207</b>
Abstract .....	207
1. Engineering-Economic Analyses – Do They Miss the Problem?.....	207
1.1. The Micro-Economic Understanding of Decision-Making.....	208
1.2. Shortcomings of the Barrier Debate.....	209
2. Opening the Black Box - A Closer Look at the Adoption of Energy Efficiency Solutions .....	210
2.1. Economic Decision Is Only One Step In a More Complex Process of Adoption .....	210
2.2. Energy Issues Are Usually Neglected and Need Distinct Impulses to Get Back on the Agenda.....	212
2.3. Energy Efficiency Needs to Be Perceived as a Promising Opportunity for Individual and Collective Action .....	213

2.4. Efficiency Projects Risk Being Turned Down Due to Insufficient Decision Preparation.....	213
2.5. Feedback Loops and Learning Effects Contribute to Self- Dynamic Action .....	214
3. Dimensions of the Implementation of Energy Efficiency Solutions .....	216
4. New Insights into the Nature of Transaction Costs .....	218
5. The Original Contribution of Socio-Economic Research to the Policy Domain of Technical Progress and Diffusion .....	220
6. Conclusions .....	222
7. References .....	223
<b>Motivation and decision criteria for energy efficiency in private households, companies and administrations in Russia</b>	
<i>Inna Gritsevich</i> .....	<b>227</b>
1. Introduction .....	227
2. Basic motivations and rationales for energy saving .....	228
2.1. Regional and Municipal Administrations .....	228
2.2. Private Households .....	229
2.3. Businesses .....	231
3. Conclusion .....	231
4. References .....	232
<b>List of Editors and Authors</b> .....	<b>233</b>
<b>List of Reviewers, Rapporteurs, and Discussants</b> .....	<b>235</b>
