

# Contents

## PART I – OVERVIEW

1 Supply Chain Management Projects with APO .....	3
1.1 The Supply Chain Management Approach .....	3
1.2 Supply Chain Management Projects with APO .....	6
1.3 APO Project Peculiarities and Project Management.....	7
2 SCM Processes and APO Modules .....	9
3 APO Architecture .....	15
3.1 Technical Building Blocks of APO.....	15
3.2 System Integration Overview .....	17
3.3 Master Data Overview.....	18
3.4 Model and Version .....	23
3.5 Planners .....	25
3.6 Order Categories.....	25
3.7 Pegging.....	26
3.8 Data Locking .....	29

## PART II – DEMAND PLANNING

4 Demand Planning .....	33
4.1 Demand Planning Overview .....	33
4.1.1 Demand Planning Process.....	33
4.1.2 Planning Levels and Consistent Planning .....	34

4.2 Data Structure for Demand Planning .....	36
4.2.1 Characteristics, Key Figures and Structure Overview .....	36
4.2.2 Planning Object Structure and Planning Area .....	37
4.2.3 Configuration of the Planning Object Structure .....	38
4.2.4 Configuration of the Planning Area .....	39
4.2.5 Disaggregation .....	41
4.2.6 Organisation of Characteristic Value Combinations .....	43
4.2.7 Time Series .....	45
4.3 Planning Book, Macros and Interactive Planning .....	46
4.3.1 Planning Book .....	46
4.3.2 Macros .....	51
4.3.3 Fixing of Values .....	55
4.4 Statistical Forecasting .....	56
4.4.1 Basics of Forecasting .....	56
4.4.2 Data History .....	57
4.4.3 Univariate Forecast Models .....	57
4.4.4 Multiple Linear Regression (MLR) .....	59
4.4.5 Forecast Execution .....	59
4.4.6 Life Cycle Planning .....	63
4.5 Promotion Planning .....	65
4.6 Dependent Demand in Demand Planning .....	71
4.7 Collaborative Forecasting .....	74
4.8 Background Planning .....	75
4.9 Release of the Demand Plan .....	77
4.9.1 Topics for the Demand Plan Release .....	77
4.9.2 Forecast Release .....	78
4.9.3 Forecast After Constraints .....	80
4.9.4 Transfer to R/3 .....	81
5 Forecast Consumption & Planning Strategies .....	83
5.1 Make-to-Stock .....	83
5.2 Make-to-Order .....	84
5.3 Planning with Final Assembly .....	85
5.4 Planning Without Final Assembly .....	87
5.5 Planning for Assembly Groups .....	89
5.6 Technical Settings for the Requirements Strategies .....	90

PART III – ORDER FULFILMENT
-----------------------------

6 Order Fulfilment Overview .....	95
7 Sales .....	97
7.1 Sales Order Entry .....	97
7.2 Availability Check Overview .....	98
7.2.1 Functionality Overview for the Availability Check .....	98
7.2.2 ATP Functionality for Document Types .....	99
7.3 Master Data & Configuration .....	102
7.3.1 Master Data for ATP .....	102
7.3.2 Basic ATP Configuration .....	102
7.3.3 Time Buckets and Time Zones .....	105
7.4 Product Availability Check .....	107
7.4.1 Product Availability Check Logic .....	107
7.4.2 Product Availability Check Configuration .....	109
7.5 Allocations .....	112
7.5.1 Business Background and Implications .....	112
7.5.2 Configuration of the Allocation Check .....	114
7.5.3 Allocation Maintenance and Connection to DP .....	118
7.5.4 Collective Product Allocations .....	119
7.6 Forecast Check .....	119
7.7 Rules-Based ATP .....	120
7.8 Transportation & Shipment Scheduling .....	130
7.9 Backorder Processing .....	132
8 Transportation Planning .....	141
8.1 Transportation Planning Overview .....	141
8.2 Master Data and Configuration .....	143
8.2.1 Master Data for TP/VS .....	143
8.2.2 Geo-Coding .....	148
8.2.3 Configuration of the CIF .....	150
8.3 TP/VS Planning Board .....	150
8.4 TP/VS Optimisation .....	152
8.5 Scheduling .....	155
8.6 Carrier Selection .....	156
8.7 Collaboration .....	157
8.8 Release and Transfer to R/3 .....	158

PART IV – DISTRIBUTION
------------------------

9 Distribution & Supply Chain Planning Overview.....	161
9.1 Distribution & Supply Chain Planning Scenarios.....	161
9.2 Applications for Distribution & Supply Chain Planning .....	163
9.3 Order Cycle for Stock Transfers .....	167
9.4 Integration of Stock Transfers to R/3 .....	169
9.5 SNP Planning Book.....	174
10 Integrated Distribution & Production Planning.....	179
10.1 Cases for Integrated Planning .....	179
10.2 SNP Optimiser.....	181
10.2.1 Basics of the Supply Network Optimiser.....	181
10.2.2 Optimiser Set-Up and Scope.....	182
10.2.3 Costs and Constraints.....	183
10.2.4 Discretisation .....	185
10.2.5 Technical Settings .....	188
10.3 Capable-to-Match.....	189
10.3.1 CTM Planning Approach .....	189
10.3.2 Prioritisation, Categorisation & Search Strategy .....	192
10.3.3 CTM Planning .....	194
10.3.4 CTM Planning Strategies .....	200
10.3.5 Supply Distribution .....	202
11 Distribution Planning .....	205
11.1 Master Data for Distribution Planning .....	205
11.2 SNP Heuristic .....	208
11.3 Planned Stock Transfers.....	208
11.4 Stock in Transit .....	210
11.5 Storage & Handling Restrictions.....	211
11.6 Sourcing .....	213
12 Replenishment .....	215
12.1 Deployment .....	215
12.1.1 Deployment Overview .....	215
12.1.2 Deployment Heuristic .....	216
12.1.3 Fair Share Between Distribution and Sales Orders.....	222
12.1.4 Deployment Optimisation .....	225
12.2 Transport Load Builder .....	228

PART V – Production
---------------------

13 Production Overview .....	237
13.1 Production Process Overview .....	237
13.2 Applications for Production Planning .....	241
13.2.1 Scenario and Property Overview .....	241
13.2.2 Lot Size .....	246
13.2.3 Scrap .....	248
13.3 Feasible Plans .....	250
13.4 Master Data for Production .....	253
13.4.1 Production Master Data Overview .....	253
13.4.2 Resource for SNP .....	256
13.4.3 PDS and PPM for SNP .....	258
13.4.4 Resources for PP/DS .....	263
13.4.5 PDS and PPM for PP/DS .....	268
13.4.6 Integration to PP-PI .....	273
13.5 Dependencies to the R/3 Configuration .....	275
14 Rough-Cut Production Planning .....	277
14.1 Basics of Rough-Cut Production Planning .....	277
14.2 SNP Heuristic .....	280
14.3 Capacity Levelling .....	282
14.4 SNP Optimisation for Production Planning .....	283
14.5 Capable-to-Match (with SNP Master Data) .....	285
14.6 Scheduling in SNP .....	286
14.7 Integration to PP/DS and R/3 .....	289
14.7.1 Process Implications of Rough-Cut & Detailed Planning .....	289
14.7.2 Integration to PP/DS .....	290
14.7.3 Integration to R/3 .....	294
15 Detailed Production Planning .....	295
15.1 Basics of PP/DS .....	295
15.1.1 Order Life Cycle and Order Status .....	295
15.1.2 Scheduling and Strategy Profile .....	297
15.1.3 Planning Procedure .....	299
15.1.4 Real Quantity .....	300

15.2 Heuristics for Production Planning .....	300
15.2.1 Concept of Production Planning and MRP Heuristic .....	300
15.2.2 Production Planning Heuristics.....	301
15.2.3 MRP Heuristic.....	304
15.2.4 Net Change Planning and Planning File Entries .....	305
15.2.5 Mass Processing .....	305
15.3 Consumption Based Planning .....	308
15.4 Material Flow & Service Heuristics.....	308
15.5 Tools for Visualisation and Interactive Planning .....	310
15.5.1 Product View.....	310
15.5.2 Product Overview .....	314
15.5.3 Product Planning Table .....	314
15.6 Reporting.....	316
15.7 Special Processes for Production Planning .....	319
15.7.1 MRP Areas.....	319
15.7.2 Production in a Different Location .....	321
15.8 Capable-to-Match (with PP/DS Master Data).....	322
16 Sales in a Make-to-Order Environment.....	323
16.1 Process Peculiarities and Overview .....	323
16.2 Capable-to-Promise .....	325
16.2.1 Steps Within the CTP Process .....	325
16.2.2 Configuration of the CTP Process .....	326
16.2.3 Problems with Time-Continuous CTP .....	328
16.2.4 Bucket-Oriented CTP.....	330
16.2.5 Limitations for CTP .....	333
16.3 Multi-Level ATP .....	334
16.3.1 Steps Within the Multi-Level ATP Process.....	334
16.3.2 Configuration of the Multi-Level ATP .....	336
16.3.3 Limitations for Multi-Level ATP.....	337
17 Detailed Scheduling .....	339
17.1 Planning Board.....	339
17.2 Basics of Detailed Scheduling.....	344
17.2.1 Scheduling Strategies .....	344
17.2.2 Error-Tolerant Scheduling .....	346
17.2.3 Finiteness Level .....	347
17.3 Scheduling Heuristics.....	347
17.4 Sequence Dependent Set-Up.....	351

17.5 Sequence Optimisation.....	355
17.5.1 Optimisation as Part of the Planning Process .....	355
17.5.2 Optimisation Model and Scope .....	356
17.5.3 Optimisation Controls Within the Optimisation Profile ...	358
17.5.4 Handling and Tools for Optimisation .....	364
18 Production Execution .....	367
18.1 Planned Order Conversion .....	367
18.2 ATP Check and Batch Selection .....	369
18.3 Production Order Handling .....	370
19 Modelling of Special Production Conditions .....	373
19.1 Alternative Resources.....	373
19.2 Modelling of Labour .....	377
19.3 Overlapping Production .....	378
19.4 Fix Pegging and Order Network .....	379
19.5 Push Production.....	383

<p><b>PART VI – External Procurement</b></p>
--

20 Purchasing .....	387
20.1 Purchasing Overview .....	387
20.1.1 Process Overview.....	387
20.1.2 Order Life Cycle and Integration to R/3 .....	387
20.2 Suppliers and Procurement Relationships.....	391
20.3 Supplier Selection.....	392
20.4 Scheduling Agreements.....	394
20.5 Supplier Capacity .....	397
21 Subcontracting .....	401
21.1 Subcontracting Process Overview.....	401
21.2 Modelling of the Production at the Receiving Plant .....	402
21.3 Modelling of the Production at the Supplier .....	404
21.4 Subcontracting Process Variants .....	408
21.5 Subcontracting in SNP .....	410

**PART VII – Cross Process Topics**

22 Stock and Safety Stock.....	415
22.1 Stock Types in APO.....	415
22.2 Safety Stock.....	416
23 Interchangeability.....	421
23.1 Interchangeability Overview.....	421
23.2 Interchangeability in DP.....	422
23.3 Interchangeability in SNP.....	423
23.4 Interchangeability in PP/DS.....	424
23.5 Interchangeability in ATP.....	426
24 Exception Reporting.....	427
24.1 Basics of Alert Monitoring.....	427
24.2 Alert Types.....	429
24.3 Alert Handling.....	433
24.4 Alert Calculation in the Background.....	435
24.5 Supply Chain Cockpit.....	435

**PART VIII – System Integration**

25 Core Interface.....	439
25.1 Overview of the Core Interface.....	439
25.2 Configuration of the Core Interface.....	439
25.3 Integration Models and Data Transfer.....	442
25.4 Master Data Integration.....	446
25.5 Transactional Data Integration.....	450
25.6 Operational Concept.....	452
25.6.1 Organisation of the Integration Models.....	452
25.6.2 Organisation of the Data Transfer.....	453
25.6.3 Data Consistency.....	454
25.6.4 Queue Monitoring.....	454
26 Integration to DP.....	461
26.1 Data Storage in Info Cubes.....	461
26.2 Data Loading Structures.....	463
26.3 Data Upload.....	466

Appendix
