

Table of Contents

Chapter 1 Geographic Information Technologies – An Overview	1
Sanjay Rana and Jayant Sharma	
Chapter 2 Soft Computing in Geographical Information Systems	47
Yingjie Yang, David Gillingwater and Chris Hinde	
Chapter 3 Using Geospatial Information for Autonomous Systems Control	63
Ayanna Howard and Edward Tunstel	
Chapter 4 Agent-Based Technologies and GIS: Simulating Crowding, Panic, and Disaster Management	81
Michael Batty	
Chapter 5 Distributed Geospatial Information Service	103
Chaowei (Phil) Yang and C. Vincent Tao	
Chapter 6 Geospatial Grid	121
Liping Di	
Chapter 7 Geospatial Semantic Web	139
Yaser Bishr	
Chapter 8 The role of DBMS in the new generation GIS architecture	155
Sisi Zlatanova and Jantien Stoter	
Chapter 9 Multimodal Interfaces for Representing and Accessing Geospatial Information	181
Reginald G. Golledge, Matthew T. Rice and R. Daniel Jacobson	
Chapter 10 Wayfinding with mobile devices: decision support for the mobile citizen	209
Sabine Timpf	

Chapter 11 Augmented Reality Visualization of Geospatial Data	229
Daniel Holweg and Ursula Kretschmer	
Chapter 12 Geo-ICT and Development – The Inverted Pyramid Syndrome	241
Satyaprakash, Ayon K.Tarafdar and Ravi Gupta	
Chapter 13 Privacy Issues in Geographic Information Technologies	257
Alastair R. Beresford	
Chapter 14 Frontiers of Geographic Information Technology	279
Sanjay Rana and Jayant Sharma	
References	289
Subject Index	325
